### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

This office action is in response to the amendment filed August 16, 2004.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

*Claim 16 is rejected under 35 U.S.C. 102 (e) as being anticipated by Tachihara et al. (Tachihara) (Patent Number 6,617,067).*

Regarding claim 16, Tachihara discloses a converter for a catalytic conversion of liquid fuel, comprising an evaporator pipe (e.g. 1, 10), which consists of a cylindrical recess for fuel (T) and is situated in the interior of the catalytic converter (3) and a feed for a partial gas stream of

exhaust gas and/or intake air (7), introduced in parallel whereby the converter is designed as a honeycomb element (See Figures 1-4; col. 7, lines 50-67; col. 8-9, lines 1-67; col. 10, lines 1-17).

***Claim 16 is rejected under 35 U.S.C. 102 (e) as being anticipated by Lesieur (Patent Number 6,620,389).***

Regarding claim 16, Lesieur discloses a converter for a catalytic conversion of liquid fuel, comprising an evaporator pipe (e.g. 2), which consists of a cylindrical recess for fuel (12) and is situated in the interior of the catalytic converter (8) and a feed for a partial gas stream of exhaust gas and/or intake air (14), introduced in parallel whereby the converter is designed as a honeycomb element (See Figures 1-4; col. 4, lines 11-67; col. 5, lines 1-41).

#### ***Allowable Subject Matter***

Claims 1-15, and 17 are allowed.

Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.

#### ***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of two patents:

Komaki et al. (Patent Number 66833126), and Kotani et al. (Patent Number 6833208) all disclose a fuel conversion system for use with an internal combustion engine.

***Response to Arguments***

Applicant's arguments filed August 16, 2004 have been fully considered but they are not completely persuasive. ***Claims 1-17 are pending.***

Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection as discussed above.

Applicant's amendment (Claims 1-17) necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL See MPEP, 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

*Conclusion*
